Hello,

Re Chaotic situation for the Wolves in Sweden

We want to express our concern for the wolves here in Sweden. We assume that you are going to have a meeting with Lena Ek (C) about her decision to kill a lot of wolves in January 2013. This message has upset many people in our country and there are many activities.

Sweden is not using the Art- and Habitatdirective, it's not included in the Swedish law in a correct way, they have excluded important part and everything is twisted. This has also Prof Gabriel Michanek, Uppsala University, told the Government - but nothing has happened! Prof Michanek told me that he also was going to write to you about this.

The situation is getting worse and more worse because of the many men in top-positions who are hunters and they have known each other for a long time and they rule the Swedish politics. The Government can't solve the present situation because of this undemocratic way of decisions. It's like a hunter-mafia who takes all decisions and it will end with zero wolves in our country.

We beg you: help us! Please, put the Swedish State into the EU Court. The illegal hunting is very extensive and the wolves have an extreme situation, they are so stressed.

The (C) ("Centerpartiet") are under the 4%-level and will probably lose in the next selection 2014. The minister Eskil Erlandsson is doing everything the hunters want and he is a very bad politician – everyone in the social media wants him to resign. He has now the power to decide about forests, wild animals, domestic animals and the animals are suffering badly. He is changing the law in a negative way for the environment and for the animals.

The European people think that Sweden has a good economy but who has paid for it? It is the poor people; young, old, sick and people with no work. The TV has showed us the truth and Swedish people are angry. Everything the "Alliansen" has done, has been bad for the people except for the rich ones. The picture of Sweden the European people have, are wrong! The government = "Alliansen" will fall!

With kind regards
