URGENT

**ILLEGAL HUNTING OF SUSI AND HER NEW PARTNER , in so-called JUNSELE area.
Both of them are going to be kill in a day or two!**

This hunting must be stopped immediately!

The Wolves are outside the reindeers, what we call, homearea, a place where the reindeers are staying both in summer and wintertime.

The wolves have a legal right to be where they are now!

Now the Swedish EPA has showed the Swedish people on which side they are – and it's not on the animals side!

This time it was reported that this two wolves had been taken 2 reindeers/month since November - last year when it was a similar situation as today, when they shot Susi's partner, the number of killed reindeers where about 15 reindeers in about three months – this is nothing! The sami-people who owns the reindeers are both well compensated for wolf presence in the area and they are also compensated for the loss of reindeer, so we wonder when will the madness stop?

The “nature-protectors” of Sweden are now raging and the consequences for the small wolf population will be a disaster.

We can't wait no longer for your help! The madness in Sweden must come to an end.

With kind regards

Kristina Hallin Charlotte Swanstein Johanna Parikka Altenstedt
